Penny Stocks package – What is it?

- Penny Stocks package is the most popular package from the stable of HBJ Capital because of the huge magnitude of the returns it offers to its customers.
- Before suggesting any stock under Penny Stocks Package, the team of research analysts carry out complete due diligence like visiting companies, talking to management, company officials etc and thus ensure that there's no risk attached to any of the recommendations.
- Earnings growth and re-rating of the stocks are the two key factors that drive our investment philosophy. The companies that are usually selected are less than 100 crore Market capitalization.
- The package was first introduced in May 2009 and since then we have come out with almost 1 Multibagger recommendation every month.
- For the record, since May'2009 we have come out with one 7 bagger, one 5 bagger, one 3 bagger, one 2.6 bagger, two 2.5 bagger, three more than 50% recommendation returns pick and three more than 35% recommendation returns pick.
- **The Penny Stocks Package costs Rs. 15,000 on a yearly subscription.**

Package Offerings

Business Insight – Business Insight Recommendations are the highest potential recommendation from Penny Stocks Package. These recommendations can fetch investors a return of 1000-1200% (Read 10-12 times) in a period of 3 years. The stocks selected under Business Insight category are small companies with a market cap of 100 crore or less.

Before coming out with a BI recommendation, the research team at MPS carries out complete due diligence in terms of company visit, discussion with the management, discussion with other company officials and most importantly discussion with the distributors and the customers of the company. These companies are the Pantaloons, Praj, Educomp of tomorrow.

Value Pick – The Value Pick recommendations from the Penny Stock Package can fetch you multibagger returns in a period of just 8-10 months. The stocks selected under this category are undervalued and are on a verge of value unlocking by exponential growth in earnings. We select stocks that are both low on PE and have some kind of expansion in place that will lead to huge value creation for the shareholders.

Instant Profit – Instant Profit or IP picks are capable of giving you 20% returns in a 1 month time period and they are expected to move on short term triggers. The package offers 24 IP recommendations with a 1 year subscription – 2 per month.

Flashback – Monthly update on our last 12 Business Insight recommendations. The update covers latest updates on the company, change in share holdings and miscellaneous news items.
